## DETAILED ACTION

### *Election/Restrictions*

1. **Claim(s) 3, 4, 7, and 8** is/are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 04/18/2008.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claim(s) 1 and 5** is/are rejected under 35 U.S.C. 102(b) as being anticipated by Bonzon U.S. Patent No. 3051266.

4. **Regarding claim 1**, Bonzon discloses an emergency brake device for an elevator comprising:

5. a connecting body 20 capable of being displaced with respect to a sheave 1 which is rotatable;

6. a brake body 8 provided to the connecting body 20, which is capable of coming into and out of contact with an outer periphery of the sheave 1 and capable of being

Art Unit: 3654

displaced in a rotation direction of the sheave 1 while maintaining a contact with the outer periphery of the sheave 1;

7. a brake drive device 12 which displaces the connecting body 20 in a direction in which the brake body 8 comes into and out of contact with the outer periphery of the sheave 1; and

8. a gripper metal 22 including an inclined portion caused to incline with respect to the outer periphery of the sheave 1, the brake body 8 being meshed between the outer periphery of the sheave 1 and the inclined portion when the brake body 8 is displaced in the rotation direction of the sheave 1,

9. wherein the brake body 8 comes into contact with the outer periphery of the sheave 1 and is meshed between the outer periphery of the sheave 1 and the inclined portion, so that rotation of the sheave 1 is braked.

10. **Regarding claim 5**, Bonzon discloses a connecting body position returning device 15, Column 3, Lines 36-38, which biases the connecting body 20 against the displacement of the brake body 8 when the brake body 8 is displaced in the rotation direction of the sheave 1.

### ***Claim Rejections - 35 USC § 103***

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

12. **Claim(s) 2 and 6** is/are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonzon U.S. Patent No. 3051266 in view of Koppensteiner U.S. Patent No. 4538706.

13. **Regarding claim 2**, Bonzon is silent concerning wherein the brake body is a brake roller rotatably provided to the connecting body.

14. Koppensteiner teaches wherein a brake body is a brake roller 8 rotatably provided to a connecting body.

15. It would have been obvious to one of ordinary skill in the art at the time of the invention to make the brake body disclosed by Bonzon a brake roller as taught by Koppensteiner to facilitate the braking and movement of the brake body.

16. **Regarding claim 6**, Bonzon discloses a connecting body position returning device 15, Column 3, Lines 36-38, which biases the connecting body 20 against the displacement of the brake body 8 when the brake body 8 is displaced in the rotation direction of the sheave 1.

### ***Conclusion***

17. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Holland U.S. Patent No. 4923055, Bialy et al. U.S. Patent No. 4977982, Lamb U.S. Patent No. 5202539, Ito U.S. Patent No. 7080717, Ito U.S. Patent No. 7267201.
